**The Unexpected Risks of AI in Finance: What You're Not**  
**Watching Could Cost You featuring Sonatype & NVIDIA**

Fintech  
Open Source  
Foundation

**[Why Attend: FINOS OSinFinance Webinar - The Unexpected Risks of AI in Finance: What You're Not Watching Could Cost You](#)**

*Hosted by FINOS, featuring Sonatype & NVIDIA*

**Date:** May 7, 2025 **Time:** 11:00 AM ET / 4:00 PM BST **Location:** Virtual

Financial institutions are rapidly deploying Artificial Intelligence (AI), Machine Learning (ML), and Large Language Models (LLMs) into production systems. However, the speed of adoption often outpaces the understanding and mitigation of novel, hidden risks that can lead to significant security breaches, compliance failures, and operational disruptions. Are you aware of the threats lurking beyond the algorithm itself?

In this critical FINOS-hosted session, we bring together experts from **Sonatype**, **NVIDIA**, and **FINOS** to shine a light on the less visible, yet critically important, threats emerging at the complex intersection of AI technology, underlying hardware infrastructure, and the software supply chain that builds these systems.

This isn't just another discussion about AI bias or model risk. We will delve into the foundational vulnerabilities and evolving external pressures that financial firms must address as AI integration accelerates.

**What You Will Learn:**

This webinar will provide a comprehensive overview and practical guidance on navigating the multifaceted risk landscape of AI in financial environments:

- **Unexpected Security Vulnerabilities:** Understand how the unique architecture and components of AI systems introduce novel security weaknesses that traditional application security might miss.
- **Hardware-Level Threats:** Discover the often-overlooked risks present at the hardware layer that supports AI, and how compromises at this fundamental level can undermine the trustworthiness and security of AI models and data.
- **Evolving Regulatory Scrutiny:** Gain insight into what global financial regulators are increasingly focusing on regarding AI adoption, and how compliance expectations for AI risk management are rapidly evolving.
- **Practical Mitigation Strategies:** Receive actionable strategies and best practices for identifying, assessing, and mitigating AI, open source software (OSS), and infrastructure risks specifically within the highly regulated financial services context.

This is a must-attend session if your firm is deploying or planning to deploy AI/ML/LLM projects into production, engaging with Generative AI, or is in the process of reevaluating and updating its risk management frameworks in response to regulatory initiatives around AI.

## Who Should Attend from Your Firm?

This webinar is essential for leaders and technical staff responsible for AI development, deployment, security, compliance, and risk management within financial institutions:

- Heads of AI / ML / LLM Architecture and Engineering
- Open Source Program Office (OSPO) and Developer Platform Teams
- Information Security and Cybersecurity Leads
- Regulatory Risk, Compliance, and Audit Leaders
- Executives overseeing AI Adoption Strategy and Software Supply Chain Risk
