

Fintech Open Source Foundation

# An Introduction to FINOS The home for open source & open standards in Financial Services

# What is FINOS?

Fintech Open Source Foundation

The Fintech Open Source Foundation (FINOS) is an **independent**, **non-profit membership organization** whose purpose is to **accelerate** collaboration and **innovation in financial services** through the adoption of Open Source software, standards and best practices.

FINOS is also the financial services project of the Linux Foundation, the largest shared technology investment in the world.

Oh, and in case you're wondering, it's pronounced fee·nowz

## The LF is behind the most critical projects in the world

**FINOS** Fintech Open Source Foundation

finos.org

# What do we do, at a glance?

The Fintech Open Source Foundation (FINOS) acts as an **independent**, **neutral**, **compliant steward** for transparently governed open source, open standards and specifications **relied & collaborated upon by the financial industry at large**.

Supported by over <u>100 member organizations</u>, we nurtured **2000+ contributors from financial institutions, big tech and fintech vendors** to mutualize resolution of **common, non-differentiating strategic challenges** in <u>50+ open projects</u>.

FINOS also runs an <u>Open Source Readiness Initiative</u> to help financial firms harvest the full business value of open source participation, in full regulatory compliance

FINOS hosts the **Open Source in Finance Forum**, the only **Open Source conference** solely focused on financial services and regulated industries.

#### **OPEN STANDARDS**

#### **OPEN SOURCE SOFTWARE**

**Solution Space** 

# **FINOS Project Sandbox**

#### **Benefits**

**For adopters:** it shows the art of the possible of FINOS projects.

For project maintainers and contributors: it lowers barriers to participation and helps projects scale, providing a venue for consumers and contributors to engage.

#### What is the FINOS Project Sandbox?

The **FINOS Sandbox** allows FINOS open source projects to host a public runtime environment to serve different purposes, like enabling easy evaluation, public collaboration or delivering real life demo environments. The FINOS technology team provides infrastructure and operational support to project maintainers, enabling them to focus on development rather than operations.

#### **Propose a Project for Inclusion**

All contributors to **FINOS projects** that are affiliated with a **FINOS Member** can request to be included in the FINOS Project Sandbox by emailing <a href="mailto:help@finos.org">help@finos.org</a>.

# Why projects choose FINOS/LF vs going it alone

#### **Technical Infrastructure**

Community

**Legal & Governance** 

**Technical Infrastructure & Tooling.** FINOS handles not only Github/Gitlab set-up and maintenance but also provides CI/CD tooling (through **LFX** and **its collaboration infrastructure** to accelerate compliant, secure developer commits and pull requests.

Security Scanning and responsible disclosure. FINOS uses several best-of-breed technologies to scan code for <u>CVEs</u> and implements a professional <u>vulnerability</u> responsible disclosure.

**Migration.** For projects not already open sourced, FINOS assists with the legal and technical inspection required to prepare a project code base to be open sourced under the Apache 2.0 license (the preferred license of the foundation).

**Ready and Growing Community.** Rather than build a developer community from scratch, FINOS projects plug into a <u>vibrant community</u> across over 50 Projects.

**OSS Enabled Community.** FINOS is trusted by the largest financial institutions to enable their developers to participate in open source projects in a compliant way. Monitor the growth of our community at **metrics.finos.org** 

**Community Management Support.** FINOS supports its projects in their development of roadmaps and feature prioritization. FINOS also helps with promoting projects to both contributors and end-users including press releases, microsites, social media, webinars, and in person events. See our **world class staff**.

**Neutrality.** FINOS provides a neutral home and transparent governance for industry standards and open source projects. See our **Governance**.

Open Source Readiness. Our Open Source Readiness (OSR) project supports your journey towards Open Source.

**IP Validation.** FINOS handles the licensing agreements with developers -- and our CI/CD tooling checks they are in place upon commit using the **LFX EasyCLA tool**.

**Governance.** FINOS <u>provides</u>, monitors, and helps (gently) enforce "rules of the road" to foster community, promote contribution, and encourage meritocratic development based - all in compliance with regulated industries requirements and sensitivities. See our <u>policies</u>

# FINOS helps you unlock the value of open source in financial services

If you are Open Source ready you can engage in our 50+ projects. If you are not, we can help you accelerate your corporate OS readiness.

# The Five Stages of OSS ROI in FSI

#### STAGE

#### **VALUE**

OSS ROLIS directly proportional to Corporate OSS maturity

#### LEAD

Become a Member and **Special Interest Group** 

Influence the overall strategy and focus of the Foundation by participating as a Member or on the Governing Board, and ensure sustained growth for the projects your care about

#### **CONTRIBUTE**

Grow adoption and contribution to a critical open source component or open standard in a neural environment with the support of the FINOS community

#### **PARTICIPATE**

Interact directly with some of the best technical talent in the industry, collaborating and influencing the direction of our projects towards efficiently solving ever more common industry challenges

#### **CONSUME**

Any of the Foundation's open source (Apache v2) software and open standards projects as well as Open Source Readiness enablement material

Immediately realize value by leveraging FINOS financial services grade open source projects and open standards adopted by the largest global FSIs as well as ready-made material to accelerate your own enterprise OSS journey

#### **EVALUATE**

The FINOS Project Landscape, our Github organization, the State of Open Source in Financial Services report, LFX Community metrics, our Knowledge Base

Get valuable insights on the business challenges open source is solving in the financial industry and learn more about the open source projects and standards currently available to address those

# Not ready? We can help you realize the ROI!

**Financial services** firms face **unique challenges** to collaborate in the open:

Legal & regulatory concerns

Lack of internal policies

**Cultural friction** 

Heavily restricted technology environments

Driving Open Source in Financial Services starts by **enabling safe, compliant open source consumption and contribution.** FINOS provides industry accepted, open and free materials:

Meetinas

The <u>Open Source Readiness (OSR) Special Interest Group (SIG)</u>, meeting on a monthly basis, is a venue dedicated to discussing open source readiness challenges for financial services firms. The purpose of the OSR SIG is consolidate years and years of the major financial institutions into a set of best practices which enable the whole industry to participate in open source projects in full safety and compliance, thus unlocking innovation and industry-wide mutualization.

<u>Reference OS Policy</u>

Template for a comprehensive open source software policy for a financial services institution, including sample provisions governing the acquisition and use of OSS, and contribution to OSS projects.

Resources

OS License Compliance
Handbook

Reference guide to practical compliance information for the most common open source licenses. Great for engineers and compliance staff operationalizing compliance with third-party license.

OSR Body of Knowledge eNew!

Years of experience and collective wisdom from the largest financial institutions in rolling out open source projects and addressing FSI specific regulatory requirements, publicly available for you to jumpstart your journey

Introducing the Open Source Readiness (OSR) Initiative

Learn more at finos.org/open-source-readiness

# **Open Source**

IN FINANCIAL SERVICES

# Best Practices Readiness Maturity Excellence

#### Why is it important?

- Addresses the unique challenges financial institutions face in leveraging open source software, including navigating regulatory compliance and managing security risks.
- Enables firms to accelerate innovation and maintain competitive edge by tapping into the collaborative and evolutionary nature of open source development.

#### How to get Involved

Attend OSR meetings found on our calendar Join the mailing list <a href="mailto:osr+subscribe@finos.org">osr+subscribe@finos.org</a>

#### What is OSR?

A targeted program developed by FINOS to help financial services firms advance their open source programs. Focuses on ensuring compliance, fostering innovation, and promoting collaborative development across financial institutions and tech companies.

#### How does it work?

- Through the development of best practices, guidelines, and tools tailored for open source compliance, security, and effective project management.
- By creating a collaborative ecosystem of financial services firms, technology providers, and regulatory bodies to share knowledge, challenges, and solutions.
- Facilitating working groups and community events focused on specific areas of open source readiness and advancement.

# **2025 FINOS Strategic Initiatives**

Each year the FINOS Governing Board and its Members identify strategic priorities across our 60+ projects: the FINOS Strategic initiatives receive focused attention from the FINOS team and dedicated funding.

The newly formed AI Readiness
SIG will provide a space to address challenges that are common to all members to develop a governance framework that manages the on-boarding, development of, and running AI-based solutions within FS organisations.

#### **BECOME A MEMBER**

Attract and retain talent, influence the direction of the Foundation overall strategy, socialize key projects and initiatives with like minded leaders across financial services and technology.

Apply here.

#### LEAD STRATEGIC INDUSTRY INITIATIVES

FINOS is a neutral trusted pan-industry venue to address C-Level technology centric challenges, which can be addressed through open collaboration and standardization.

#### **CONTRIBUTE CODE & USE CASES**

Contributing to existing project, even just a patch, unlocks the real value of OSS. But your teams informing us on strategic "use cases" / "business challenges" is also a huge way to influence our projects and drive contributions from vendors / individuals.

#### JOIN OUR EVENTS

FINOS hosts the leading event for open source in financial services, the **Open Source in Finance Forum** as well as meetups, webinars and several member-only events. See **finos.org/claendar** 

# Open Source in Finance Forum 2024 (#OSFF2024) was another major milestone in the growth of our movement

In 2024, we brought together 1800 delegates in NYC & London representing a 50% year on year participant growth for <u>OSFF</u>. This vibrant mix of senior decision makers and developers highlights the exponential growth of collaboration & adoption of open source across the FSI industry.

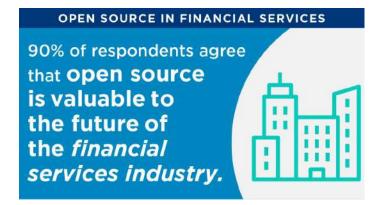

#### **Major announcements included**

- FINOS Released First Draft of Al Governance
   Framework for Financial Institutions with
   Industry-Leading Support
- BlackRock and Morgan Stanley Achieved
   FDC3 2.0 Conformance, Leading the Charge
   in Industry Interoperability
- <u>Unveiled FINOS' 2024 State of Open Source</u> in Financial Services

# FSIs are living an OSS awakening...

"I believe that open source will become the prevalent software model in the next 10 to 20 years, with even more organizations actively participating and contributing."

**Enterprise Architect, London Stock Exchange Group** 

#### **OPEN SOURCE IN FINANCIAL SERVICES**

78% agree that their organizations are getting more value from open **SOURCE** compared to 2022.

"Participation is driven by our ability to address issues or add functionality in the software that we rely on, and we use a lot of open source software. Working with open source software should be part of people's roles because the software is critical to what we do."

Managing Director, RBC Capital Markets

# The 2025 State of Open Source in Financial Services

Fintech Open Source Foundation (FINOS)

#### October 2025

Hilary Carter, Linux Foundation Tosha Ellison, FINOS Colin Eberhardt, Scott Logic

Brittany Istenes, FINOS Ambassador Adrienn Lawson, Linux Foundation Foreword by Michael Abbott, Accenture

## Get learning today! https://training.linuxfoundation.org/finos/

### **How FINOS Delivers Value to its Members**

FINOS members are **essential to the success of the Foundation** and are **instrumental in steering the direction** of open source in financial services. **Our Members** benefit from:

#### **Access and network**

Access the Financial Services developer and decision maker community

**Governance & Legal** 

#### Standardization

Work with financial services customers **once** (in the open) instead of building customizations for every customer

# Flexibility &

**Interoperability** 

Leverage FINOS
governance and legal
support enabling banks
to safely collaborate in
the open

Achieve interoperability with other vendors by driving standards and reduce concerns for vendor lock-in

#### **OS Commoditization**

Disrupt a locked-in industry through Open Source commoditization and open core models

### Talent acquisition and retention

Lead in the open source space, enabling your developers to participate in open source projects and attracting top talent

#### Compliance-as-code

Collaborate with industry leaders - and increasingly with regulators - to build compliance-as-code implementations

#### First-mover

Position your technology as part of the reference architecture for fintech OSS. Only FINOS Members can propose new Projects.

#### **Cut technology TCO**

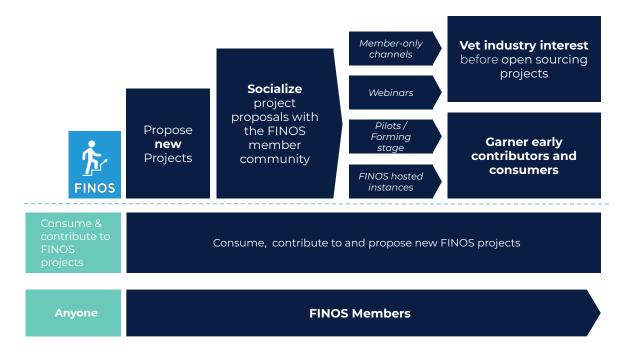

Mutualize cost on vast amount of non-differentiating financial services technology

## Embrace a modern development workflow

Use and learn from the FINOS Open Developer Platform

## Member benefit zoom-in: Projects

Yes, anyone can consume and contribute to existing FINOS projects. But **only FINOS Members can propose new projects**!

#### **Member Success Stories**

**FDC3**: An originally vendor led effort, turned into a global industry standard connecting buy-side and sell side, showing the value of FINOS as a neutral host for counterparts and competitors

CDM: Three trade associations (ISDA, ICMA, ISLA) choosing FINOS as a trusted neutral host to grow the adoption of CDM embracing a truly open source model

Morphir: originally contributed by Morgan Stanley, a framework with high potential now has gained traction and contributors from competing organizations

Perspective: originally contributed by JP Morgan, this high performance real-time visualization has drastically grown in contributions and adoption. This project has transitioned from FINOS to the OpenJS Foundation - a positive and significant milestone that reflects growing adoption across industries beyond financial services.

# **FINOS Membership Tiers**

\$200,000 / year

Geared towards large financial institutions; asset, wealth and fund managers; and large tech companies

GOLD

\$50,000 / year

Targeted at market data providers, large ISVs and SIs, technology partners and exchanges.

SILVER

\$10K-30,000/year
Silver membership fees scale based on
# of employees

Suitable for startups, and small consulting firms with limited resources but an appetite to

**ASSOCIATE** 

No Cost

Restricted to government organizations, regulatory bodies, nonprofits and academic institutions

Complete the <u>membership application</u> and we'll be in touch shortly!

FINOS Members must also become Members of the Linux Foundation (at any tier). More info here.

FINOS also has an INDIVIDUAL SUPPORTER PROGRAM, reserved for individuals who significantly contributed to Foundation projects, and emeriti who contributed to shaping FINOS with their thought leadership.

# **Linux Foundation Membership Benefits**

All FINOS members must also become members of the Linux Foundation at any tier (more information <u>here</u>).

Some of the benefits your organization can take advantage of by being an LF member include:

#### **LEGAL**

- Conferences. Join exclusive legal conferences including the annual <u>LF Legal</u> <u>Summit</u>, <u>LF Open Compliance Summit</u>, legal tracks at the Open Source Leadership Summit, and access the bimonthly legal coursel calls
- Ad-hoc support. Engage with our open source compliance experts for ad hoc discussions ranging from potential new projects to internal program office structures and processes.

#### **STRATEGIC GUIDANCE**

- Best Practices. Opportunity for your open source program office to participate in the TODO Group (todogroup.org) and Open Source Security Foundation (OpenSSF).
- Introductions to other Linux Foundation members and hosted projects of interest to expand business opportunities

#### **INSIGHTS**

- Leverage <u>LFX Insights</u> to validate projects for investment, and track the activity and growth of projects you're already involved in.
- Gain visibility on your project's code pipeline and performance metrics. Ensure the health & viability of the open source projects you care about.
- Showcase your organization's leadership and subject matter expertise in the open source community

#### **EVENTS**

- **Discounts** for <u>Linux Foundation Events</u>
- Access to exclusive, member-only events like the LF member summit

#### **TRAINING**

- Discounts. Access discounted <u>LF Training</u> & Certification offerings. Check out the <u>LF Course Catalog</u> and use the <u>quote tool</u> to obtain your discounts.
- Platinum ONLY. Enterprise wide license to Open Source Management and Best practices curriculum

#### MARKETING

- Lead sponsored webinars.
- Participate in articles and press releases.

For more information, see the <u>Linux Foundation</u>
Member Benefits

finos.org

# Ready to join the FINOS family?

Complete the <u>membership application</u> and we'll be in touch shortly.

#### Why is it important?

- Ensuring safe and compliant AI use through best practices and a governance framework for financial services.
- Addressing shared challenges like risk modeling, threat analysis, and regulatory alignment fosters unified Al governance.

#### **How to Get Involved**

Contact the FINOS team directly through our website.

#### What is the AI Readiness SIG?

The newly formed AI Readiness SIG will provide a space to address challenges that are common to all members to develop a governance framework that manages the on-boarding, development of, and running AI-based solutions within FS organisations.

#### **FINOS AI Strategic Initiative**

FINOS serves as the AI +FS hub for Open Collaboration in FS

- Goal: Develop industry-wide best practices & a governance framework for the safe and compliant use of AI
- Key Activities: Use-case driven risk modeling, threat analysis, mitigation strategies, & alignment with regulatory expectations.

#### **FINOS LLM Exploration**

- Goal: Grow a stronger community of financial institutions blended with academia to nurture the creation of truly open source Al
- Key Activities: Identify precompetitive use cases & prior-art, setting benchmarks & standards, tooling exploration

#### **FINOS Research Fund**

- Goal: Accelerate R&D efforts for the FSIs by mutualizing priority areas of FINOS LLM Exploration with pooled funds from FINOS members
- **Key Activities:** Develop and maintain open financial **datasets** and **models**

discount of the last

FINOS Fintech Open Source Foundation

#### Why is it important?

- Addresses cybersecurity, compliance, and cloud concentration risks in financial services cloud deployments.
- Mitigates systemic risks associated with cloud concentration and facilitates secure, compliant cloud usage across the industry.

#### **How to Get Involved**

Visit the project's page on GitHub Contact the FINOS team directly through our website.

#### What is the FINOS Common Cloud Controls?

The FINOS Common Cloud Controls (FINOS CCC) is a pioneering initiative aimed at standardizing cloud deployments within the financial services sector. By establishing consistent controls for compliant public cloud deployments, FINOS CCC ensures security, compliance, and resilience across major CSPs, setting a new benchmark for secure and reliable cloud usage in the industry.

#### How does the FINOS CCC work?

- Develops a unified set of cybersecurity, resiliency, and compliance controls across major CSPs through collaboration among financial institutions, CSPs, technology vendors, and regulatory bodies.
- Utilizes a common services taxonomy and associated threats to create standardized controls, supported by working groups such as the Taxonomy and MITRE ATT&CK Framework.

### **COMMON DOMAIN MODEL**

#### What are the benefits?

- **For Derivatives:** Streamlines onboarding & enhances interoperability, decreases operational risks & settlement fails, optimizes collateral management & negotiation time.
- For Securities Lending: Enables easier construction of smart contracts & faster connection to distributed ledgers and promotes innovation & competition on products rather than infrastructure.
- For Bonds & Repos: Improves internal efficiencies by enabling IT applications to communicate effectively & enhances consistency in regulatory reporting & facilitates interoperability between market infrastructures.

#### How to Get Involved

Explore cdm.finos.org

Attend the CDM Working Group meetings found on our calendar

Reach out to <a href="mailto:eteri.dvalishvili@finos.org">eteri.dvalishvili@finos.org</a> to share your CDM adoption journeys

#### What is the CDM?

The Common Domain Model (CDM) is a standardized, machine-readable, and machine-executable model representing financial products, trades, and their lifecycle events.

#### What is the purpose of the CDM?

- Enable interoperability between systems/services, removing burden of setting up connections to different systems/entities, laying groundwork for STP.
- Promote transparency and alignment between regulators and market participants.
- Speed up development of new solutions for the market by allowing providers to focus on what they specialize in rather than requiring them to interpret and represent market events and processes individually.

#### Why is it important?

- Enhances Efficiency: By enabling seamless interaction between applications, reducing the need for custom integration.
- Drives Innovation: Facilitates the development of new applications and services within the financial industry.
- Improves Workflow: Allows financial professionals to access a cohesive suite of tools, streamlining their operations.

# SCAN ME

#### How to Get Involved

Explore the FDC3 homepage at fdc3.finos.org
Attend FDC3 SIG meetings found on our calendar

Contribute to the FDC3 GitHub repository – whether it's
code, documentation, or feedback.

**Take FDC3 trainings & certification** 

#### What is FDC3?

A standardized framework developed by FINOS for interoperability between financial applications.

Aims to simplify communication and integration across different financial software.

#### How does it work?

- Standardized APIs: Enable applications to communicate actions and data.
- Context Data: A universal format for representing financial entities and actions.
- Intents: Predefined actions that an application can request from another.
- App Directory: A centralized listing of FDC3-compliant applications and services.

# The Vision for our **Open RegTech** Initiative

TRADITIONAL MODEL

Regulators define regulations...

...in comprehensive and often lengthy documents

Regulated firms interpret those regulations...

...and independently build technology solutions (or pay for vendor solutions) to meet them.

Regulators define regulations...

#### **Open Source Regulation**

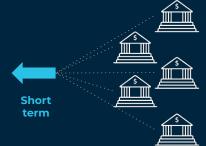

Access to Talent

Transparency

Systemic cost savings

Efficiency

Consistent Interpretation

Write once, inspect anywhere and participate & lead OSS efforts

Industry participants collaborate in the open to interpret and implement regulations

# ZENITH

#### Why is it important?

- Zenith serves as a catalyst for innovation within the financial services industry.
- It enables professionals to stay updated on emerging technologies, fostering a culture of continuous learning and adaptation.
- By exploring new technologies, Zenith helps financial institutions remain competitive in a rapidly evolving landscape.

#### **How to Get Involved**

Explore the Zenith site at zenith.finos.org
Sign up for the SIG at

zenith+subscribe@lists.finos.org

Find information on the next Zenith SIG meeting on the FINOS Community calendar

#### What is Zenith?

**Zenith** is a SIG that focuses on exploring and promoting the adoption of emerging technologies. It serves as a collaborative platform where industry professionals, experts, and innovators come together to discuss, analyze, and drive advancements in technology relevant to finance.

#### How does it work?

- Zenith operates as a SIG where industry experts, innovators, and enthusiasts collaborate.
- It facilitates discussions, conducts research, and develops resources such as primers and analysis frameworks.
- Through its activities, Zenith fosters networking, knowledge sharing, and collaboration among its members.

## **FINOS Special Interest Groups**

0

FINOS **Special Interest Groups** provide a **venue** to discuss **common challenges in financial services** and to agree on actionable **use cases**. FINOS SIGs contribute new use cases to existing projects, or lead to the proposal of new open source projects to the Foundation.

The newly formed AI
Readiness SIG will provide
a space to discuss
challenges that are
common to all members.
Get involved in the
formation today.

The **FINOS DEI SIG**, is a collaborative initiative that aims to unite contributors committed to fostering diversity and inclusivity within the industry.

The Open Source
Readiness (OSR) SIG is a
targeted program
developed by FINOS to
help financial services
firms advance their open
source programs.

Zenith is a SIG that is an industry-wide collaborative effort, hosted at FINOS, aiming to understand, define and build standards that enable adoption of emerging technologies.

Special Interest Groups meet regularly and participation is open to everyone. Find the next meeting on the <u>FINOS Calendar</u> (email <u>help@finos.org</u> if you would like to be added to a recurring calendar invite)
