

FDC3 Update

FINOS Member's Meeting June 26th, 2018

Nick Kolba, CTO OpenFin

Overview

The mission of FDC3 is the development of standards for the interoperability of desktop applications in financial workflows with the goal seamless discovery and interaction without prior, bi-lateral agreements.

- Started in October 2017 by OpenFin
- Participation from 40+ firms across the financial industry, including major sell-side, buy-side, data vendors, trading platforms, and communication platforms.

Governance
