

# Hadouken Update

FINOS Member's Meeting June 26th, 2018

Nick Kolba, CTO OpenFin

# Overview

Hadouken is an open source platform for creating web applications with native desktop experience. Hadouken is the base project used to build OpenFin OS, a desktop operating layer used by 45+ major banks, buy-side and vendors to deploy hundreds of apps to over 400 financial firms.

- Core API
- Tooling
- Desktop Services

## Governance

### PMC

- Chuck Doerr
- Espen Overbye
- Nicholas Kolba
- Ricardo de Pena
- Steven Barbaro
