What is FINOS?

The Fintech Open Source Foundation (FINOS) is an independent, non-profit membership organization whose purpose is to accelerate collaboration and innovation in financial services through the adoption of Open Source software, standards and best practices.

FINOS is also the financial services project of the Linux Foundation, the largest shared technology investment in the world.

Oh, and in case you’re wondering, it’s pronounced fee·nowz
What do we do, at a glance?

The Fintech Open Source Foundation (FINOS) acts as an independent, neutral, compliant steward for transparently governed open source, open standards and specifications relied & collaborated upon by the financial industry at large.

Supported by over 70 member organizations, we nurtured 2000+ contributors from financial institutions, big tech and fintech vendors to mutualize resolution of common, non-differentiating strategic challenges in 50+ open projects.

FINOS also runs an Open Source Readiness Initiative to help financial firms harvest the full business value of open source participation, in full regulatory compliance.

FINOS hosts the Open Source in Finance Forum, the only Open Source conference solely focused on financial services and regulated industries.
FINOS Flagship Projects

**DATA VISUALIZATION**

- **Perspective** is an interactive visualization component for large, real-time datasets, used to build reports, dashboards and more, contributed by JP Morgan.

- **Waltz** allows you to visualize and define your organization's technology landscape. Think of it like a structured Wiki for your architecture.

**INTEROPERABILITY**

- **FDC3** is an open standard that enables plug-and-play interoperability on the financial desktop.

**DATA MODELING**

- **Legend** is a data modeling platform and environment open sourced by Goldman Sachs.

- **Morphir** is a multi-language system built on a data format that captures an application's domain model and business logic in a technology agnostic manner.

**CLOUD**

- The **Compliant Financial Infrastructure** project, contributed by JPMorgan, is following an open, code-first, collaborative process to mutualize - among FIs and vendors - the cost of cloud control interpretation and implementation.

Contribute: [github.com/finos](https://github.com/finos)
Each year the **FINOS Governing Board and its Members** identify strategic priorities across our 50+ projects: the **FINOS Strategic initiatives** receive focused attention from the FINOS team and dedicated funding.

**Open Source Readiness**

Based on the experience of some of the largest financial institutions in the world, FINOS publishes an **Open Source Readiness (OSR) Body of Knowledge**, an **Open Source Maturity Model (OSMM)**, as a competitive advantage for fintech and FINOS members.

**Open RegTech**

The **Open RegTech initiative** is raising awareness on a **novel approach to regulatory technology** based on open source and standards, hosting open projects on the basis that **every industry constituent will benefit from mutualization in this area**.

**FDC³**

**FDC³** is the fast-growing standard for application and cross-industry interoperability in finance. Besides the standard itself, FINOS provides neutral offerings such as the FDC³ App Directory, FDC³ Conformance Program, open source reference implementations.
Announcing the new FINOS Zenith SIG

What is Zenith?
Zenith is an industry-wide collaborative effort, ran by FINOS, to understand, define and build standards that enable us all to adapt emerging technologies.

Why do we need Zenith?
- Reduce common effort on emerging technologies by sharing R&D
- Share ideas across theoretical, technical and commercial
- Recognise expertise across many disciplines to encourage trusted dialogue
- Provide exploratory sandboxes to remove barriers on technical readiness

What are our goals?

<table>

Member benefit zoom-in: Projects

Yes, anyone can consume and contribute to existing FINOS projects. But only FINOS Members can propose new projects!

### Member Success Stories

**Goldman Sachs: Legend**

Ahead of the Open Sourcing of Legend, FINOS set up a neutral Legend instance to run a pilot project with ~40 individual participants from Goldman Sachs, Deutsche Bank, Itau, RBC Capital Markets, Morgan Stanley, Gitlab and ISDA, among others.

**EPAM: Glue**

Ahead of the open sourcing of GLUE from our Silver Member EPAM, we ran a webinar and podcast and introduced the team to several buy-side firms.

**Morgan Stanley: Morphir**

Ahead of the contribution of Morphir into FINOS, we socialized the project with the FINOS community and organized a live demo with 22 participants from member firms.
