If there's two things...

1 Financial Services is serious about
Open Source

2 Open Source is a **massive opportunity** for
you and **your organization**

A photograph of Chris Skinner, a man with grey hair wearing a dark suit and a light blue shirt, standing on a stage and speaking to an audience. He is holding a small device in his hands. The background shows a large, dimly lit room with many people seated in rows, listening to the presentation. The lighting is focused on the speaker, with a blue hue in the background.

“ Financial services future will be open source and real time.”
